Career Objective

Motivated B.Tech student seeking internship and entry-level opportunities in Data Analytics, Python and Machine Learning. Interested in applying programming and data analysis skills to real-world projects while continuously improving technical and problem-solving abilities.

Education

DRK Institute of Science and Technology
CGPA: 7.45

B.Tech – Final Year
2027

Sri Chaitanya College
Intermediate Marks: 888

Intermediate Board Examination
2023

Technical Skills

- **Programming:** Python, Java
- **Databases:** SQL, DBMS, MySQL, MongoDB
- **Web:** HTML
- **Tools and Platforms:** Google Colab, Git, GitHub, VS Code

Projects

Deep Learning Methods for Drug Response Prediction in Cancer: Predominant and Emerging Trends

 [GitHub](#)

- Developed as a B.Tech CSE (Data Science) mini project using deep learning for binary drug-response classification.
- Built a feedforward neural network using TensorFlow/Keras with dense layers, dropout and sigmoid output.
- Used Adam optimizer and binary cross-entropy loss; evaluated the model using test accuracy and confusion-matrix analysis.
- **Technologies:** Python, NumPy, Pandas, Scikit-learn, TensorFlow/Keras, Matplotlib and Seaborn.

Smart Study Planner

 [GitHub](#)

- Built a web-based study planner to help students manage their study schedule and track progress.
- Implemented features like subject-wise planning, task reminders and progress tracking.
- Used HTML, CSS, JavaScript and local storage for data handling.
- **Technologies:** HTML, CSS, JavaScript, Local Storage, VS Code.

Certifications & Practical Experience

- **Data Analyst** – OneRoadmap Skill Certification – September 2026
- **Deloitte Data Analytics Job Simulation** – Forage – September 2026
